## MAKING BETTER HOMES A REALITY FOR EVERYONE, EVERYWHERE

### LIXIL GROUP

Every person on the planet dreams of a better home. LIXIL makes that possible with pioneering water and housing products. Born in 2011 through the merger of five of Japan's most successful building materials and housing companies, we draw on our Japanese heritage to create world-leading technology and high-quality products that transform homes. We make things that matter to all sorts of different people, to the many communities we are part of, and to sustainably support the world we live in. Today, our approach comes to life through some of the most trusted global brands in our industry, including TOSTEM, GROHE, American Standard, and INAX. We are proud that our products touch the lives of more than a billion people every day, but believe we have the potential to still do so much more.

## TOSTEM BRAND

As the leading Japanese brand for global housing and building materials, TOSTEM stands apart as one that deeply understands the needs of people. TOSTEM's comprehensive range of solutions ensures comfortable home living driven by a simple and seamless user experience. We develop our people-centric home solutions by drawing on a half-century of experience and expertise in balancing design and technology to anticipate the needs of people today and their families for generations to come.

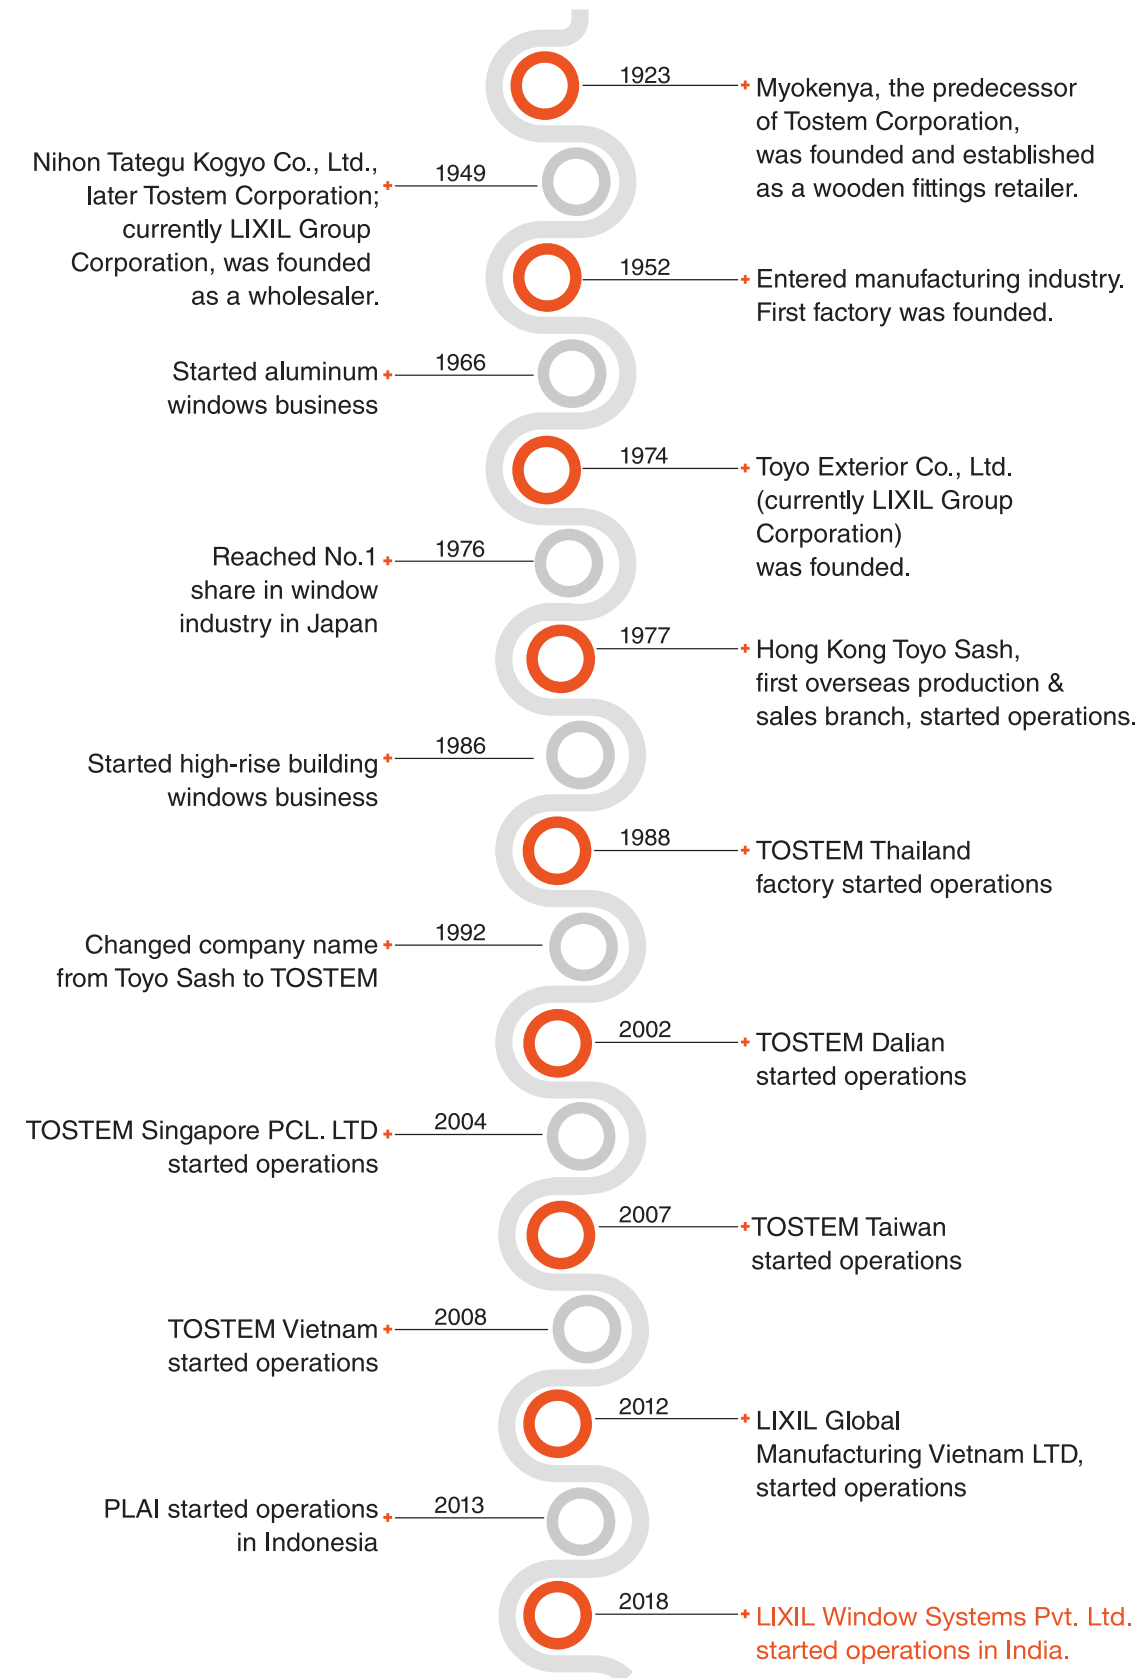

# TOSTEM

## FRAMING THE BEAUTY OF LIVING

With the harmony of functional performance and aesthetic design, TOSTEM designs to let your nature, experience the harmonious connection of outside and inside.

# TOSTEM BUSINESS HISTORY

## ABOUT TOSTEM

The global leader in pre-engineered window systems

A better home is made up of surprisingly simple things – doors and windows that connect you with the world outside; interiors and exteriors that bring spaces to life.

Recognized as the industry leader, TOSTEM manufactures a comprehensive range of Window & Door solutions. With over 50 years of experience in developing innovative products that not only anticipate the needs of our society tomorrow but equally meet the current needs of clients and consumers in different countries and climates.

### Leader in pre-engineered windows

Last mile quality often takes a back seat in the rush to complete a project. One simple answer to the problem is to manufacture the entire window at the factory and only assemble it onsite. This ensures that installation time is compressed and last mile quality is also achieved. It is a well-thought-out Japanese innovation to suit the requirements of housing projects in countries like India.

### TOSTEM, Thailand - One of the largest window factories in the world!

The facility in Bangkok, Thailand was set up in 1987 and it is dedicated to supplying pre-engineered windows to Japan & other Asian countries. It has an extrusion capacity of 7,000 MT per month, an employee strength of approx. 7,500 and covered area of 591,332 Sq.M. The production capacity is approx. 50,000 windows per day in different SKUs. The larger share is anodized finish, which is highly preferred by customers. The hardware production is in-house and the supply chain is reliably backed by extreme testing.

### Ingot to a fabricated window!

Tostem, Thailand is an integrated facility dedicated to the manufacturing of aluminum windows. Starting from the designing of new products, the casting of alloy, extrusion, surface treatment, coating & fabrication - is carried out in-house. A second manufacturing complex with similar capabilities is at Vietnam.

### Life cycle testing at accredited test lab!

Quality consistency is achieved by having end-to-end control over the entire manufacturing process. The facility in Thailand has a state-of-the-art testing facility for wind pressure, air tightness, water tightness, material composition & strength, sound isolation, thermal insulation, light & UV resistance & anodizing life test, against both JIS & ASTM Standards. Rollers are tested for 200,000 operations which is many times more than the lifetime use of the product. Detailed inspections are carried out during the design & testing stages to ensure only designs that pass strict quality control tests are made into products for delivery to customers.

# TOSTEM PRE-ENGINEERED SYSTEM

All TOSTEM products are designed, manufactured, and assembled under an integrated production process with strict TOSTEM quality control. Extrusion dies, aluminum billet, extrusion poles, coating, pre-engineered, and hardware assembly processes are all done in TOSTEM's factory in Thailand.

The greatest benefit of TOSTEM's pre-engineered system is the ability to build windows with consistent quality. The same window can be built multiple times with a single screwdriver while maintaining consistency in the quality.

In the traditional method - manufacturing, fabrication, and assembly are done partly at the factory and partly onsite. The entire process is slow and quality is very much dependent on the worker's skills at the installation stage. On the other hand, TOSTEM follows a process similar to pre-engineered buildings, where the entire window fabrication is done at the factory and only the glazing and assembly are done onsite in a quick burst of speed. To explain further:

- The manufacturing process is mass production oriented.
- Manufacturing accuracy ensures that there is no mismatch during installation.
- Hardware is fixed at the factory; site work is very minimal.
- The entire window is packed in 2 separate boxes for sash and frame.
- Supplies are made from any of the TOSTEM factories in Bangkok, Vietnam, or Shanghai.

## Design performance & actual performance is the same!

Since the entire window is manufactured at the factory, there is no deviation from design performance. The test results can be observed on windows installed onsite.

## Control till end stage, site work becomes low skill!

Work at the site usually poses more problems, due to workers skill levels and difficulty in exercising process control. The better solution followed by TOSTEM is to:

- Reduce work content onsite.
- Simplify work so that it can be done by less skilled workers (TOSTEM assembly requires only one tool – a screwdriver).
- Use visual instructions so that training requirements are reduced.

## No fabricator dependence!

TOSTEM is a window manufacturer and not merely a fabricator or a system supplier. The entire accountability for timely supplies and quality of the product is with TOSTEM. TOSTEM works with trained installers who would undertake glazing, assembly, and installation of windows. TOSTEM will always ensure that the project is completed within the time promised.

## Customer benefits over current solutions!

- Since the window is entirely manufactured in-house, there will be no shortages or rework at the site which can delay site progress.
- Quality is always consistent.
- Perfectly suited to meet high volume requirements of very large projects.

## WHY TOSTEM CAN BE TRUSTED!

### Ingot to a fabricated window!

TOSTEM, Thailand is an integrated complex dedicated to the manufacture of Aluminum windows. Design of new products, casting of Alloy, Extrusion, Surface treatment, Coating, and Fabrication is all carried out in-house. A second manufacturing complex with similar capabilities is in Vietnam. Window fabrication units are dispersed across many countries. Quality consistency is achieved by having end-to-end control over the entire manufacturing process.

### TOSTEM, Thailand - is one of the largest window factories in the world!

The facility in Bangkok, Thailand was set up in 1987 and is dedicated to supplying Pre-engineered Windows to Japan and other Asian countries. The TOSTEM factory has an Extrusion Capacity of 7,000 MT per month, an employee strength of approx. 7,500 and covered area of 591,332 Sq.M. The product range is very extensive and meets the special requirements of different countries.

### Unmatched production capacity!

The production capacity is approx. 50,000 windows per day in different SKUs. The larger share is anodized finish, which is highly preferred by customers. The hardware sourcing is in-house and the supply chain is very reliable.

### Quality assurance!

TOSTEM is committed to developing the best products to meet customers' requirements. Detailed inspections are carried out during design and testing stages to assess criteria such as basic performance, durability, weather resistance, and such. Only designs that pass strict quality control tests are made into products for delivery to customers.

## HOW TOSTEM BEST MEETS DEVELOPER REQUIREMENTS!

### Customer preference for system aluminum windows!

System Windows are becoming highly popular in India due to longer life, greater reliability, and quality assurance. Aluminum is also the dominant material for residential windows in neighboring countries like Singapore, Thailand, Dubai, and the Middle East where the climatic conditions are similar. In these markets, aluminum is seen as a premium window material.

### Contemporary designs & slim frames!

By its very nature, metal windows are both slim and strong. It is much easier to fix and operate hardware (metal to metal). Aluminum windows commonly do not require additional steel reinforcing, which is compulsory with other materials. The reinforcing can only be inserted in the middle section leaving the corners very weak. Recent developments in 'Aluminum Minimal Frames' distributes in wind-load across the whole length of the frame. The frame in 'TOSTEM - GRANTS' can also be flushed, to produce an attractive visage of glass. This system is very well suited for high rise buildings and offers a versatile range of design options.

### Cost-effective, Japanese products!

TOSTEM products are lean in design and lean in cost. This benefit comes from the excellence of design, high volume manufacturing, and cost control from ingot to fabricated window.

Japanese products like cars have won the confidence of customers in India for their very high reliability, finish, and performance. With TOSTEM, customers will enjoy similar benefits and will appreciate owning a Japanese product.

### Brand assurance & brand service!

LIXIL is a large conglomerate with brands like GROHE, American Standard, and INAX in its portfolio. All products have a reputation for the highest quality of service. Continuity and peace of mind are assured with LIXIL.

### Unique & easy installation process!

The Pre-engineered window is supplied with 'bottom plates' which are fixed in plumb on the window jamb using spacers, over which the full window is snap fitted. The window is fixed on 3 sides using anchor fasteners and airgaps are closed with silicon on the outside & acrylic inside. The process is fast & easy. No other work is required at site. There is a huge reduction in time required for installation since only the bottom plates is levelled using a spirit leveled and the use of a water line is avoided. Also, less manpower is required since only the bottom plate is to be levelled and not the entire window. Assembly and installation can be done with minimum training. The process can easily be learned. A developer can also use own team for installation.

### Low maintenance!

All surfaces and functional parts are designed to perform in a tropical climate. A call center is available in case any service is required by the customer

### Come & visit!

Many customers visit the manufacturing facility and the LIXIL Crystal Product Display Center in Bangkok to get a closer feel of TOSTEM products and their manufacturing capabilities.

# JAPANESE ENGINEERING & TOSTEM QUALITY!

## Traditional batch vs. TOSTEM mass manufacturing!

The traditional method of window manufacturing follows a batch process. General purpose machines are used and chances of mistakes are higher as the process is more man-dependent. Production speeds are also quite low.

The TOSTEM method of manufacturing uses dedicated machines (punch & die set) for every operation. Process control is better and output rates are much higher. It is also easier to exercise quality control as there is a dedicated cell for each window design.

## High-precision process!

The punch system of manufacturing followed by TOSTEM is very accurate. Anodizing finish is preferred as it has a uniform thickness of 20 microns. Powder coating is also used, but is more difficult in production, as thickness usually varies between 60-120 microns.

Since manufacturing tolerances are so close - manufacturing accuracy and flatness are also very high, which makes for great ease during glazing and assembly.

## Life cycle testing an accredited test lab!

The test lab in Japan is accredited by the Japanese Government. The factory in Thailand has the largest testing facility for wind pressure, air tightness, water tightness, material composition, sound isolation, thermal insulation, light & UV resistance, profile, and anodizing life test against both JIS and ASTM Standards. Rollers are tested for 200,000 operations which is many times more than the lifetime usage of a product.

## Ease of operation!

Windows are intended to be opened and closed many times in a day. A key aspect of the design is that effort should be minimal so that even a child can safely open the window. For instance, the effort required to open or close a 2-tract / 4-panel WE Plus Door of 4200 mm width and 2400 mm height with single glass is under 50 N (5 Kgs). The effort is so less that it does not require any mechanical assistance or automation.

## Ease of storage & transportation!

The sash and frame are packed in separate boxes. Gaskets are supplied in roll form. The entire bundle is very compact which reduces transportation costs and transit damages. The space required for storage at the site is much less which reduces the chances of theft. Lead and lift requirements are much simplified.

## Sustainable materials & fire safety

Aluminum is 100% recyclable and has a higher resale value as compared to other window materials. It is also environment friendly, fire safe and does not release toxic fumes in event of a fire. The life of aluminum windows is much longer.

# BENEFITS OF TOSTEM DESIGN!

## 50 Years' Performance History in Cyclonic Weather at Japan!

TOSTEM is one of the first, large scale manufacturer of aluminum windows in the world. Since the climate at Japan is both cold and cyclonic - highest priority has been given to make windows safe against air and water ingress. Similar to India, the dominant style in Japan is Sliding Windows, which is different from Europe where Casement Tilt & Turn is more popular.

## Greater strength, stronger corners, does not bend or crack!

The TOSTEM window is very unique as the section thickness is higher in transverse direction to sustain higher wind load. Also, the thickness is higher at points of screw fixing. The aluminum alloy used is 6063 with T5 tempering which has more strength. The corner is joined at 90° and does not require cleats, which are less strong. The TOSTEM window is stronger and has a longer performance life as compared to other window materials.

## Better air & water sealing!

Japanese windows are designed for far better performance against air and water which is very important for comfortable living.

This is achieved by:

- Rubber gaskets are used instead of wool-pile. This provides better sealing against dust, noise and water.
- Gaskets help in smooth operation of window and have a longer life.
- Precision nano-tech gaskets are used at frame corner joints to stop water ingress. It is not necessary to fill joints with silicon which is a common practice with traditional windows.
- Water entry is stopped through use of one-way drainage valve. Also the frame is designed to create a water-head between inside & outside. Using a common rule of thumb, wind pressure up to 10 times of water head can be sustained without entry of water inside.

## Special protective coating, higher life & luster!

With the patented TEXGUARD system, the colors of TOSTEM products will last at least 40 years. TEXGUARD is an additional clear synthetic resin paint deposited over the anodized surface which alters the molecular structure of the surface paint and protects the surface against light, heat and water. High scratch resistance of 4H and low accumulation of natural dust makes it easy to clean windows with less effort and retain a new-like look for a long time.

## Greater safety with crescent lock

Crescent lock is more sturdy and far safer as compared to a push lock. It can only be locked in one position and it is easy for user to see if the lock is in place. A secondary lock stops crescent lock from inadvertently getting opened.

# TOSTEM TOTAL HOUSING SOLUTION

TOSTEM engages in product development, manufacturing, and marketing of a diverse range of home products, such as window sashes, entrance doors, and exterior products. Our product portfolio allows us to provide complete "Lifestyle Solutions" that are flexible, integrated, and coordinated to consumer needs, delivering everyday satisfaction.

## WINDOWS & DOORS

Let our aluminum windows and doors frame your world. Our windows and doors come in a variety of sturdy frames to offer you effortless maintenance, years of satisfied use, and of course, a great view.

## ENTRANCE DOOR

Stepping into your home should make you relieved, comfortable, and happy. GIESTA high-quality wood-pattern or metallic finish door, equipped with a user-friendly handle with a high-security lock system gives better convenience to both family and visitors and makes us feel glad to be home.

## EXTERIOR

FENCE & GATE is a perfect fencing choice for your residence. Our fence and gate solution will enhance the look, feel and overall value of your property, and provide you with the safety and security that your family needs.

NATURAL WHITE

SHINE GRAY

AUTUMN BROWN

NATURAL BLACK

# COLOR PROCESSING

## Maximizing the strength and beauty of Aluminum

TOSTEM's unique TEXGUARD anodized finish gives a high level of protection, alongside showing the beautiful appearance of natural Aluminum. TOSTEM offers a wide range of color variations, which allows you to enjoy its lifelong beauty, adding happiness to your lifestyle.

### Benefit of TEXGUARD

- Color retention - TEXGUARD protects the Aluminum against harsh environmental conditions, making the color gloss stay for at least 40 years.
- Increased hardness - Dense coating of TEXGUARD improve hardness and provides scratch resistance for the Aluminum surface.
- Ease of cleaning - Dust and dirt accumulation resistance quality of TEXGUARD makes the task of cleaning the surface less effort.

### CERTIFICATION

## L-FIT DESIGN

L-Fit is a handle design that "Fits" in with "Living Life." This standardized design for the handles of windows and entrance doors creates a sense of uniformity and comfort in living space.

# QUALITY ASSURANCE

Quality and standards are the core of TOSTEM products.

TOSTEM products are well-known for their rigorous standard control by Quality Assurance and Quality Control Systems, to ensure only products that pass strict quality-control tests are allowed to be offered to customers. TOSTEM has state-of-the-art testing facilities for wind pressure, air tightness, water tightness, material composition and strength, sound isolation, thermal insulation, light and UV resistance, and anodizing life test, against both JIS and ASTM standards.

### WATER PENETRATION

TOSTEM products are tested on a full-size window as per the most stringent global standards like JIS and ASTM, which ensures the watertight performance of the window.

### SOUND INSULATION

At TOSTEM, windows are tested for the level of sound that can be insulated in a controlled test chamber to ensure excellent sound insulation property of the windows.

### WIND-LOAD RESISTANCE

TOSTEM windows are tested for wind-load resistance performance to ensure that the window can resist a level wind load in area height without any loss, cracking, or breakage.

### ENVIRONMENTAL TESTING

Every TOSTEM product is tested for its resistance to adverse effects of various climatic conditions such as moisture, dust, sunlight, and pollution to resist rusting and irregular fading under environmental conditions.

### MATERIALS TESTING

TOSTEM Products are tested for tensile strength and compression strength to verify the lifetime durability of Aluminium bars and hardware.

### DURABILITY

At TOSTEM, we test the window durability in real-life operations on parameters like open-close operation, endurance to impact, and overall product durability, to ensure that the windows last up to 2,00,000 cycles of operations.

# WHY PERFORMANCE IS IMPORTANCE TO US?

## Wind loading resistance performance

**WIND LOADING RESISTANCE PERFORMANCE** indicates at what level windows and doors can bear the wind load.

**THE PURPOSE** is to ensure that selected windows can resist a level of wind load in area and height without any loss, cracking, or breakage.

WIND PRESSURE RESISTANCE  
JIS (A4702-2000 and A4706-2000)

Class	Value corresponding to each class
	[Maximum pressure]
Higher ↑ S-7 (360)	3600 Pa
S-6 (280)	2800 Pa
S-5 (240)	2400 Pa
S-4 (200)	2000 Pa
S-3 (160)	1600 Pa
S-2 (120)	1200 Pa
S-1 (80)	800 Pa

## WIND PRESSURE AND VELOCITY

Wind pressure	Wind velocity	Phenomenon
1800 Pa	60 m/s	Steel tower may fall down.
1250 Pa	50 m/s	Wooden houses will collapse.
800 Pa	40 m/s	Tiles will fly. Antennas will fall off.
450 Pa	30 m/s	Twigs will snap off. Cannot stand on your own.
200 Pa	20 m/s	Signboard will fall over. Cannot walk towards the wind.
50 Pa	10 m/s	Cannot use umbrella. Hard to walk toward the wind.

AIR TIGHTNESS  
JIS (A4702-2000 and A4706-2000)

Class	Value to corresponding to each class
	[Air leak] ∠P=10Pa
Higher ↑ A-4 (2)	2m <sup>3</sup> / m <sup>2</sup> / hour
A-3 (8)	8m <sup>3</sup> / m <sup>2</sup> / hour
A-2 (30)	30m <sup>3</sup> / m <sup>2</sup> / hour
A-1 (120)	120m <sup>3</sup> / m <sup>2</sup> / hour

## AIR TIGHTNESS PERFORMANCE

**AIR TIGHTNESS PERFORMANCE** indicates how much air can pass through gaps between frame and panel of windows and doors.

**THE PURPOSE** is to evaluate the level of air coming into a room. This performance is also related to dust prevention, sound insulation and thermal insulation.

# WATER TIGHTNESS PERFORMANCE

**WATER TIGHTNESS PERFORMANCE** indicates the rate at which a window can prevent the infiltration of rainwater into a room.

**THE PURPOSE** is to help select a watertight performance that can prevent interior damage from water intrusion into a room.

WATER TIGHTNESS JIS (A4702-2000 and A4706-2000)

Class	Value corresponding to each class
	[Pressure difference]
Higher ↑ W-5 (50)	500 Pa
W-4 (35)	350 Pa
W-3 (25)	250 Pa
W-2 (15)	150 Pa
W-1 (10)	100 Pa

## SOUND INSULATION PERFORMANCE

**SOUND INSULATION PERFORMANCE** indicates a level of sound blocked out from outside to inside.

**THE PURPOSE** is to measure the level of sound that can be insulated by a window. Each project may have different sound insulation level requirements.

SOUND INSULATION PERFORMANCE  
JIS (A4706 and A4702)

Class	Sound transmission class
Higher ↑ T-4	40 dB
T-3	35 dB
T-2	30 dB
T-1	25 dB

**SOUND PERCEPTION**  
Perception towards noises varies among individuals. However, it is said that when the noise level is lowered by 10 dB (A), people feel that the noise level has halved.

Noise level dB(A)	Surrounding noise	Same noise during mid day	Impact on Hearing
110	Klaxon (1m distance) / Sound from press machine		Hearing dysfunction
100	Underneath the elevated railway tracks when trains are running		
90	In trains / At the bowling alley	Beside the railway tracks/ Motorway	Extremely Noisy
80	Intersection of main avenue / Bus traffic level	Residential area in the city/ Motorway / Street of office building	
70	On the street / Taxi traffic level	Residential area in the city/ Motorway / Residential area in suburban district / Street of office buildings	Noisy
60	Inside of department stores/ Normal conversation	Residential area in the city	
50	Quiet offices	Residential area in suburban district	Ideal level for daily life
40	Quiet parks	Residential area in suburban district	
30	Suburban area around midnight		Quiet
20	Whisper		

## TOSTEM AIRFLOW SYSTEM

TOSTEM AIRFLOW System includes GIESTA AIRFLOW: a steel wooden pattern door with integrated ventilation, AIRFLOW Door: a ventilation door with sliding window for multiple ventilation levels, and AIRFLOW SLOT: a slot for ventilation with flap in a top-notch design compatible with various TOSTEM window designs seamlessly.

### INVISIBLE SCREEN

We use a 40% thinner wire than conventional insect screens. So you get a 20% clearer view.

We have shrunk the space for bugs to squeeze through by 20%, so not even the tiniest gnat can get in.

With more AIRFLOW than conventional insect screens, INVISIBLE SHIELD lets more insect-free AIRFLOW through than any others.

## WE PLUS

WE PLUS has passed rigorous tests based on ASTM, and TOSTEM in-house's toughest standards. Available in various designs with a maximum height of 3 meters to satisfy various designers' needs in high-rise market.

### SPECIFICATIONS

Frame Depth	72 mm 104 mm (3 tracks sliding)
Height of Sill	35 mm 50 mm (all slidings)
Glass Thickness	5, 6, 8 mm (Panel: Single glass groove 11 mm) 8-13.52 mm (Panel: Laminated glass groove 17 mm)

### PERFORMANCES

WIND PRESSURE

1600 Pa  
(ASTM E330)

WATER TIGHTNESS

240 Pa  
(ASTM E331)

AIR TIGHTNESS

10.7m<sup>3</sup> / h·m<sup>2</sup>  
(ASTM E283)

NOISE INSULATION\*

T-1 (25 dB)  
(JIS A 1416)

\* Sound performance test has been done in a JIS standard controlled environment. The performance will vary by room condition. Please consult with a sound insulation specialist.

## WE 70

WE 70 series brings legendary TOSTEM quality to everyday life. Built for the mass market, yet maintaining strict quality standards. The WE 70 series is priced within everyone's reach.

### SPECIFICATIONS

Frame Depth	72 mm 104 mm (3 tracks sliding)
Height of Sill	35 mm
Glass Thickness	5, 6, 8 mm

### PERFORMANCES

WIND PRESSURE

S-1 (800PA)  
(JIS A 1515)

WATER TIGHTNESS

W-2 (150PA)  
(JIS A 1517)

AIR TIGHTNESS

A-3 (8m<sup>3</sup>/h·m<sup>2</sup>)  
(JIS A 1516)

NOISE INSULATION\*

T-1 (25dB)  
(JIS A 1416)

\* Sound performance test has been done in a JIS standard controlled environment. The performance will vary by room condition. Please consult with a sound insulation specialist.

## UNIQUE FEATURES

### PRE-INSTALLED SILL ATTACHMENT FOR PRE-CAST CONCRETE (OPTION)

Attachment allows stability around windows for a longer time against the aged deterioration of a sealant. In case of water entry from outside sealant, attachment prevents water from penetrating inside.

\*Only available for WE PLUS

### WATERTIGHT SILL WITH DRAINAGE DEVICES

## AIRFLOW SLOT

Smooth operation with bearing rollers

Air tightness: JIS A-3 when closed

Detachable insect screen for cleaning

Available with all windows

## FOLDING DOOR

## UNIQUE FEATURES

Watertight sill with drainage system

Flat sill is available and allows barrier-free passage

Smart designs prevent finger injuries

Hinge-less design

# UNIQUE FEATURES

Push-Pull bar handle easy to operate. Just push or pull after unlock to open the door

2 locks that control 3 latches

Remove inside key head to prevent from unlocking in case of burglary

Lock-unlock with ease with reversible key

Frame sealed with foam for watertight and anti-pinch

Door filled with insulation material for heat prevention and noise insulation

# GIESTA AIRFLOW

## A PERFECT SOLUTION FOR YOUR OWN COMFORT WITH MINIMAL DESIGN

High-performance wooden pattern steel door Giesta AIRFLOW series with integrated AIRFLOW window and insect screen is a perfect combination that keeps designing and housing comfort at heart. Giesta AIRFLOW allows air inside your house to circulate in and out all day to cool the living space, reduce humidity, remove unpleasant odor for serene ambience.

Invented to truly create soothing ambience and adding comfort to your home. Let the wind flow into the living space by opening ventilation panel without worrying as the AIRFLOW panel is wide enough to let the air flow in easily and too small to be entered from. Security is at its best with multi-lock function to lock and unlock by single lock at handle but securely lock 2 positions. Giesta AIRFLOW is Japanese Industrial Standards (JIS) certified and guaranteed with Japan's KIDS Design Award for its user-friendly and child safety design.

Provide passive ventilation environment

Complete air flow with security

Keep mosquito and pest away from your home

## SIMPLE OPEN/ CLOSE OPERATION

AIRFLOW window is swing-in and can lock and unlock easily by using single lock handle to control 2 locks (Multi-lock). Open-close smoothly with high-performance hinge.

Lift lock handle to unlock

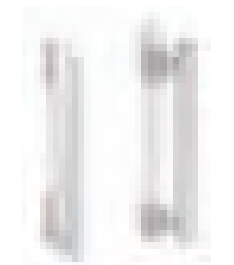

Pull down lock handle for ventilation

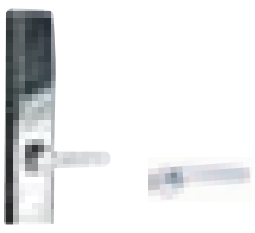

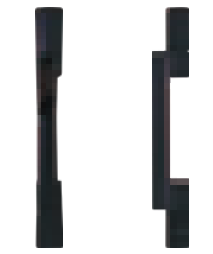

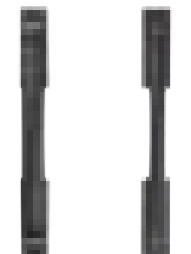

## EASY TO CLEAN

Deep clean every corner without removing any part by spraying water from garden hose to insect screen from outside the room (please make sure that the AIRFLOW window and the door is completely closed)
